

THE ARABIC SCHOOL

The school is a place where we can learn about the world and ourselves. It is a place where we can learn about the different cultures and languages of the world. It is a place where we can learn about the different ways of thinking and feeling. It is a place where we can learn about the different ways of living and working. It is a place where we can learn about the different ways of being human.

Because we are human, we are different. We are different from each other and from the world. We are different from the way we think and feel. We are different from the way we live and work. We are different from the way we are human.

Due to these differences, we can learn about the world and ourselves. We can learn about the different cultures and languages of the world. We can learn about the different ways of thinking and feeling. We can learn about the different ways of living and working. We can learn about the different ways of being human.
